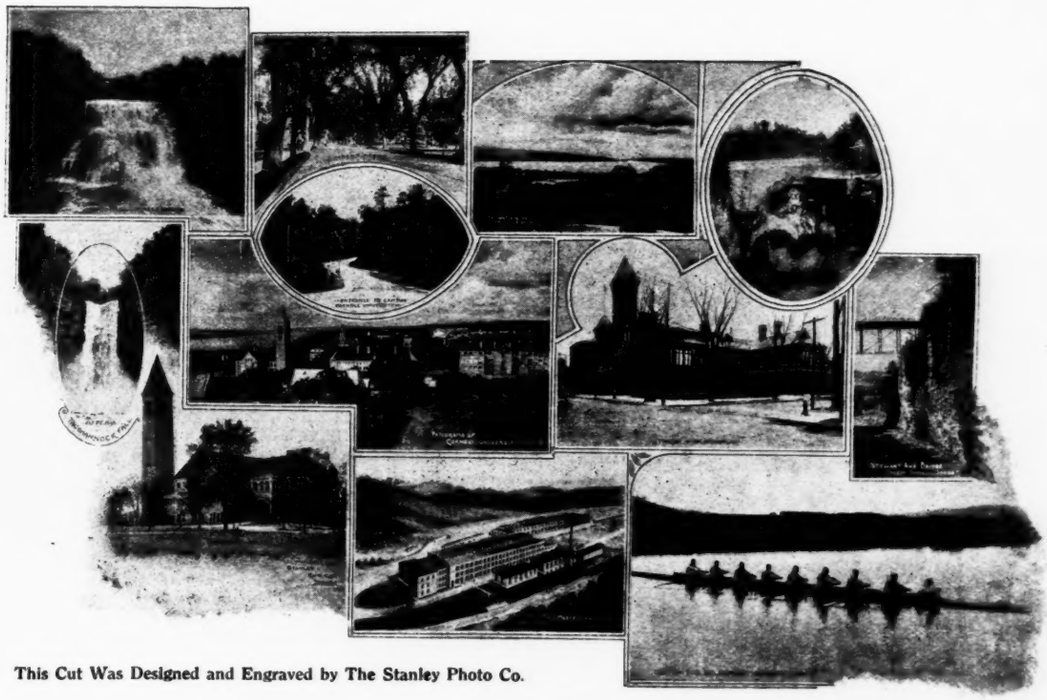
# HOLSTEIN-FRIESIAN WORLD

Vol. VI. ITHACA, NEW YORK, JULY 8, 1909. No. 13



This Cut Was Designed and Engraved by The Stanley Photo Co.

## FAIREST LITTLE CITY.

At the head of fair Cayuga,
Nestling in among the hills;
Backed by orchards, fields and meadows,
Washed by splashing streams and rills,—

Picturesque by nature fashioned,
Beautified by human skill;
At her feet Cayuga Sparkling,
Crowned by Cornell on the Hill;—

First in beauty, first in culture,
Let the slogan forth be hurled;
Ithaca's the Fairest Little
City of the Western World.

---

From "The Good, the Beautiful, the True," poems by C. G. Brown, Ithaca, N. Y. Price $1.00 postage prepaid.

# King Fayne Segis No. 46767.

THE ONLY SON OF

## Grace Fayne 2d's Homestead

**Record 35.55 lbs. butter in 7 days, being the largest 7 day record ever made, and sired by the great**

**KING SEGIS OF MOYERDALE FAME**

**Stands at the head of the Bloomingdale Herd. We offer a few young bulls by this great sire out of daughters of Hengerveld De Kol, Paul Beets De Kol, and Johanna Rue 3d's Lad.**

**Jacob Reger, Supt.** **A. A. CORTELYOU**

**Belle Mead, N. J., R. F. D.** **Somerville, N. J.**

## FAIRVIEW FARM HOLSTEINS

We offer five bulls ready for immediate service. Also ten bull calves all from A. R. O. dams; two from 24 lb. 3 yr. olds; two grandsons of Princess Leo Netherlands 26.02 lbs. Their sire is Aaltje Salo Mercedes DeKol Prince, No. 39357. Sire of 9 A. R. O. daughters. One above 20 lbs. at 2 yrs. 1 mo.; another 18.77 lbs. at 2 yrs. 3 ds. Send for pedigree, or letter; come and select. All over 6 mo. old Tuberculin tested.

**O. J. GODFREY & CO.** **Pennellville, Oswego Co., N Y.**

# We Have Between 50 & 60

heifers from eight months to two years old, most of the older ones due to calve in the fall and early winter. We must sell at least half of them and the first comer will have the most from which to pick.

Quality considered, we do not believe our prices can be duplicated.

Will also sell two car loads of extra good cows.

Henry Stevens & Son, Lacona, N. Y.

## Competent Farm Manager Wanted

A good opportunity for the right man to secure a position managing and running a dairy farm, situated on the Conewango river, close to Trolley Line. This farm is in Southern Chautauqua County, New York, fully equipped with up-to-date farm and dairy machinery, good buildings capable of keeping 40 or 50 cows and some young stock, besides a couple of teams to do the work. It will be necessary for man to be used to raising Holstein-Friesian cattle, feeding and making A. R. O. records, besides oversee the general farm work, farm and creamery hands are expected to be boarded by the manager, so inside help will be necessary. The farm house is fairly well furnished. Good schools, pleasant surroundings. Good salary to right man. Situation open Oct. 1st. None but young, energetic men who can handle the proprosition and furnish satisfactory references need apply. Address The Walker Ice Cream Co., Ltd., Warren, Penna.

**HOLSTEIN-FRIESIAN ASSOCIATION OF AMERICA.**

## PLEASANT VIEW STOCK FARM.

Pleasant View Stock Farm is rightly named. Situated on a sightly crest on the southern brow of the beautiful Mohawk Valley, none can dispute the right and title to the name "Pleasant View." To the northeast lies Saint Johnsville, which from that altitude looks very near, altho' by the road it measures over four miles. To the north one can look down on East Creek with its antique covered bridge and romantic snrroundings, while almost at your feet the Mohawk twines in silvery bands, tempting the eye to follow on and on till lost in a turn down the beautiful valley, To the west one may look to Little Falls, across the valley away to the north the factory chimneys of Dolgeville may be seen on a clear day and to the south one can look away to the silent peaks that stand sentinel over historic Cherry Valley.

Did you ever stop to think of the difference between beauty and grandeur? Grandeur is found in the Rocky Mountains, the Grand Canyon, the Yosemite Valley and kindred places. Beauty is found in just such peaceful pastoral spots as our own valley, when on a clear spring or summer day it lies clothed in all its freshness and is seen from some vantage point as for instance, Pleasant View Stock Farm.

But it is not of landscapes that I started to write, so passing by that part of my text relative to Pleasant View I will turn to the consideration of the "Stock Farm." part of the text.

Now I will say on the start that stock farm in this case means, Holstein Friesian stock, duly registered and recorded in the great books of the Holstein-Friesian Breeders' Association.

I am indebted to Mr. Miller, or "Alt" as he prefers to be known to his friends (and I am one) for several little points on Holsteins which had hitherto escaped me.

In the first place "Alt" informs me that he did not purloin the names of his cattle from Pullman sleeping cars, a suspicion which I must confess I had previously entertained.

Take as an illustration Netherland Koroba, No. 80110. What a beautiful name for a sleeping car. But there is method to be found in these fantastic names. For instance Netherland Koroba's papa was Prince Pietertje De Kol Netherland, and her mama was Koroba 3d. Her grandpa was Sir Netherland Alexine and her grandma was Koroba, thus ye see the names Netherland Koroba carries a significance, and the practical dairyman breeder knows at once from the names which line of ancestry or "strain" the animal comes from.

I also learned that a 12, 20 or 30 pound cow referred to the cow's butter capacity for seven days, and had no reference to the animal's actual avoirdupois. It was a little confusing to a common pencil pusher to survey a gentleman ox (over the fence) who at a rough guess would weigh a ton, and listen to the assurances of his owner that he was a sure enough 30 lb. sire, but afterwards it was drilled into me that in his majesty's proud heritage there were dairy prides who thought nothing of tossing off 30 lbs. of golden butter for a week's work.

Now a 30 pound cow is not a world beater. We are informed that the record is 35 and a fraction. But thirty pounders are not plentiful. Neither are 25 pounders. As yet we have not reached 30 pounds at Pleasant View Stock Farm. The actual figure so far is 24.19 lbs. by Koroba Pietertje, and this is the cow on whom Mr. Miller pins his hopes of entering the 30 pound class.

But let us see what it means to be a 24 pound cow. To do this Koroba Pietertje yielded in seven days 565.5 pounds of milk and in thirty days 2,222.6 pounds from which the butter yield was 90.62 pounds. In other words this pride of Pleasant View gave over a ton of milk in a month's time, and in the seven day test averaged better than 80 pounds of milk a day, yielding nearly 3½ pounds of butter daily. In the language of the prophets that is "going some" and "Alt" fully believes that Koroba Pietertje is destined to enter the 30 pound, or better, class when she freshens next fall.

But I am getting way ahead of my story. Fourteen or fifteen years ago it occurred to Mr. Miller that if there

was profit in squeezing milk out of cows, the better the cow, the better the profit. He accordingly started in a small way by purchasing a few choice Holsteins from the Meadowvale stock farm, (Burrell's) and from this small beginning has developed the present beautiful Holstein-Friesian herd which dots the landscape all about Pleasant View Stock Farm.

Don't think for a moment that all has been pleasant sailing. Since the early days in the breeding business, Mr. Miller has known many disappointments, many set-backs, but through it all he has had faith in himself, faith in the Holstein, and by careful weeding and crossing with the best stock available, he has fairly come into his own with a strain purely of his own breeding, which have proved their worth in the very first test.

Among the first Holsteins brought to the farm was Koroba, No. 77590, sired by Kobarund, dam Korund, whose ancestry Mr. Miller believes were imported from Holland by Meadowvale stock farm. From these names Kobarund and Korund, Mr. Miller christened the present beautiful and productive herd of Pleast View Stock Farm.

Koroba is still alive and occupies the place of honor at the head of her table (or stable), and when the ensilage is passed Koroba gets her's first.

Can you buy her? Try it once, seriously, and note the extreme range of (Alt's) vocabulary.

From Koroba comes the similarity of names found throughout this herd In the next succeeding generation we find Koraba II, 8105; Koroba III, 8106; Koroba IV, 8107, and so on. At the present time there are eight Korobas on the farm. Among her descendants three were entered in the advanced registry last winter and all made good, and of these Koroba Pietertje, the pride of the herd, stood at the top. This latter cow has a great future and is one of the few of Mr. Miller's possessions on which he refuses to put a price.

For the benefit of the few who with myself did not or do not know the meaning of "advanced registry" I will explain.

Advanced registry means that a man is sent from Cornell Agricultural College to test certain cows thought to be eligible. This man watches the herd, watches the milker; trust nobody. He examines the pail, makes you milk one cow at a time, and when finished takes charge of the milk. This he proceeds to weigh and test for butter fat, after which he proceeds with the next cow in a similar test. He keeps the records and he alone knows what these figures are.

Tests are usually made seven to thirty days, and sometimes sixty and ninety days. Eligibility to the advanced registry class, is confined to 15 lbs. of butter in 7 days for five year old cows or over.

Last year Mr. Miller for the first time submitted his herd to an official test, and of the seven cows entered everyone passed successfully.

They were: Koroba Pietertje, No. 80108, A. R. O. No. 8746, four years old Seven day record—milk, 565.5; butter, 24.19; thirty days—milk, 2222.6; butter, 90.62.

Lady Black Koroba, No. 80109, A. R. O., No. 8703 Seven day record—milk, 429.1, butter 18.51.

Netherland Koroba, No. 80110, A. R. O., 8608. Milk, 407.4; butter, 15.26.

Koroba DeKol, No. 80206, A. R. O. Butter, seven days, 17.04.

Black Diamond Pledge, No. 96362, four years old. Seven day record—milk 445; butter, 21.19; thirty days—milk, 1821.3; butter, 84.53.

DeKol Hartog Clothilde Artis, No. 74722, seven day record—mik, 412; butter, 17.40.

Kora DeKol Netherland, No. 89541, seven day record—milk, 363.50; butter, 15.81.

From this, it seems that the advanced registry has no terrors for this breed, and in justice to the herd, it must be said, that Mr. Miller made no special preparations for the test, and that most of those entered were 3 year olds.

The Koroba family are sired mostly by Prince Pietertje De Kol Netherland, No. 32330, A. R. O., 637. In order to obtain registry in the advanced class it is necessary for a sire to have four daughters who show 500 lbs. of milk or better. At the time this bull received his mark (1909) he was the 637th advanced registered bull in the United States.

The present king of the herd is Clothilde Concordia, No. 38387, for whom Mr. Miller has thrice refused $3,000. Think of an animal whose value is that of a medium sized farm, but he is worth more than a farm to "Alt". Look at his record? Sired by Paul DeKol, son of Sadie Val Concordia, seven day record, 694.0 milk; 30.64, butter; thirty day record—2752.60 milk, 123.67 butter; sixty day record—5093.60 milk; 220.52, butter.

His mother, Genie Clothilde, was a 30 lb. cow and she comes of the same line of breeding as the present world champion 35.55, Grace Fayne 2d's Homestead. The daughters of Clothilde Concordia will be bred to the famous Cookdale Stock Farm herd bull, King Prilly Segis, No. 46768.

The product of Pleasant View Stock Farm is in ready demand. At a recent sale in Syracuse thirteen head consigned by Mr. Miller brought $2 390. On the farm today are a pair of twin calves, Segis Koroba strain, for which Mr. Miller has refused $500. Recently he sold to Frederick Bros., Canajoharie, a pair of two-year-olds bred on Timmerman Brothers' Stock Farm. One of these recently freshened and showed tests of 4.4 to 4.7 butter fat.

Throughout the Mohawk Valley the offsprings of Koroba are being introduced and wherever the strain is found, the butter and milk standards are improved. Mr. Miller is deserving of just the kind of success that is coming to him after all these years of study. He has reduced the breeding industry to a science, and his incorporated ideas have blossomed and borne abundantly. He has introduced to animal posterity, a name—and that name is KOROBA.

Long live the Korobas and long may their silken black and white lend harmony to the color scheme, and add life to the pastoral beauties of Pleasant View Stock Farm.—Bill Slocum, in St. Johnsville Enterprise.

# Study Table

By S. Hoxie.

## SOCIALISM AS A RECENT MOVEMENT.

"Socialism", says Hillquit in his recent work,* "Advocates the transfer of ownership in the social tools of production—the land, factories, machinery, railroads, mines, etc.—from the individual capitalists to the people, to be operated for the benefit of all."

That such a movement would be no departure from precedent he adds; "This program has been denounced as confiscatory and revolutionary, but it is no more so than was the abolition of chattel slavery. It has been ridiculed as utopian and fantastic, but it is no more so than the demands of the eighteenth century capitalist for the abolition of the privileges of birth were to his contemporaries."

The intelligent American reader is familiar with the history of the latter movement, the abolition of titular privileges, in 1775, on which were grounded our Declaration of Independence and he may have been an active participant in the former movement—the

*Socialism in Theory and Practice, (1909) p. 11.

doing away with chattel slavery in this country.

Hillquit adds that "Our social progress is a movement toward perfect democracy. The successive stages of our civilization mark the disappearance of one class privilege after another. Why should mankind halt in reverence and awe before the privilege of wealth? When an heir to millions is born today, he has the same exceptional position in society and the same power over thousands of his fellowmen that the new-born duke or marquis had in times past; and the justice and logic of the situation are the same in both cases. A true democracy is one in which all babes are born alike, and all human beings enjoy the same rights and opportunities." It would seem that these statements, so clear, so simple and so just, would require no further defense or explanation. Yet in view of the stubborn conservatism that holds us to the past, the pain with which new ideas are received, and the adoration for old institutions and ancient times common to us all, I quote the following paragraph from one of the sweetest spirits among American authors.*

"But the greatest of human sufferings, those which embitter all life, have been of human infliction. The situation of the great majority of mankind in ancient times—those of which we have any definite record—was one of abject wretchedness. Aready existed only in the poet's fancy. In a state of barbarism men's wants were few and simple, but their passions were violent, and for the weak there was no security. Every desirable garden upon earth was a bait to the rapacity of conquest, the arena of invasion following upon invasion, like the waves of a hungry sea. Civilization, on the other hand, was organized selfishness; and its peace was, for the great body of the people, a level desolation. Their lot was one of humiliating drudgery, of depressing, hopeless poverty."

This statement is not an exaggeration. Remnants of its institutions still remain with us. No one can successfully deny that our modern system of business is still "organized selfishness". The class system distinguishing the poor from the rich is the same, and the tyranny of the latter over the former is the same. This system and its effects on propertyless agricultural laborers I studied in Holland thirty years ago. It evidently was improved from ancient times by a common school education, yet it was still "humiliating drudgery and depressing hopeless poverty". A strong, industrious man was able to earn from sixty to seventy dollars a year. One of my earliest views of it was a woman harnessed up with a horse drawing a canal boat. It, probably was not as cruel as the like system in Russia, or as vile as the submerged tenth in England.

Except for trade-unionism, which is, one and the same as business, "organized selfishness", there is no doubt our wage workers in factory and field would be reduced to like conditions. The rapid accumulation of vast wealth of our country indicates that this would be the case. Business and unionism is at war. This is now true in every civilized country. We cannot help sympathizing with the latter from the fact that it was not the original aggressor. On the part of business this contest is approved on the Darwinian theory that such a struggle must exist to secure the "survival of the fittest".

Spargo carefully considered this claim in his new and revised work on Socialism.* He says Darwin himself raised this point in view and shows in many animal societies the struggle for existence is replaced by co-operation for existence and how that substitution results in the development of faculties which secure to the species the best conditions for survival."*

He then continues: "From the lowest forms of animal life up to the highest man, this law [co-operation] proves to be operative. It is not denied that there is competition for food, for life, within the species, human and other. But that competition is not usual; it arises out of unusual and special conditions. There are instances of hunger-maddened mothers tearing away food from their children; men drifting at sea have fought for water and food as beasts fight, but these are not normal conditions of life." "Happily enough," says Kroptken,** competition is not the rule either in the animal world or in mankind. It is limited among animals to exceptional periods.....Better conditions are created by the elimination of competition, by means of mutual aid and mutual support."* This is the voice of science now that we have passed through the extremes and arrived at the "beautiful goal of calm wisdom". Competition is not, in the verdict of modern science, the law of life, but of death."

Crozet, Albemarle County, Virginia.

As another witness to nature's voice for co-operation, I quote again from God in His World, pages 37 and 38: "Truly the children of this world are wiser in their generation than the children of light. In every successive state of their development, they come nearer and nearer to a simulation of the kingdom unfolded in the Gospel. While the Christian theorist insists that human selfishness is ineradicable, the movement of unregenerate society is tending to a point where altruism will be accepted as a scientific necessity. Men have already so far comprehended the dvine teachings of Nature as to know that there is no individual health except through the health of the community. They find also, now that they undertake vast industrial and commercial enterprises, that, having called so largely upon Nature's vitalities, they are confronting also her larger spiritual meanings, unheeded hitherto, and that their vast and complex machinery, with its accelerations through steam and electricity will not work without incalculable waste, friction and uncertainty as to its beneficient result to anyone concerned in its management, except through a human fellowship in its control as universal as Nature's co-operation therewith."

If this is true—and I doubt it not, for it is the principle on which all great trusts win success—why should it not be the principle on which all labor and business be organized in fellowship as wide and comprehensive as our country and its citizenship?

## Field Notes.

Bulletin No. 166, University of Wisconsin, discusses "Disinfection and Commercial Disinfectants". It is by M. P. Ravenel, M. D. and K. W. Smith.

Holstein-Friesian World:

At a recent meeting of the Special Prize Committee it was voted to duplicate the prizes offered for our breed at the Kentucky State Fair, held at Louisville, Ky., Sept. 13 to 18.—J. W. Newman, Secretary, Louisville, Ky., to whom all requests for premium lists should be addressed. The amount of money to be shown for at this fair is $700, and it is very desirous that a good showing of the breed be brought out. Please make note of this and be on hand.

W. B. BARNEY,
Chairman Spec. Prize Com.

Bulletin No. 175, University of Wisconsin, is an account of a "Three Year Campaign Against Tuberculosis in Wisconsin," by H. L. Russell and Conrad Hoffman.

Bulletin No. 173, University of Wisconsin, is a discussion of Milking Machine Experiments by F. W. Woll and G. C. Humphrey The conclusion is a guarded recommendation under very restricted conditions

The Fourth Annual Meeting of the American Association of Farm Institute Workers will be held in Portland, Oregon, Aug. 16 and 17, 1909. For information apply to Secretary-Treasurer John Hamilton, Washington, D. C.

I notice that the A. J. C. Club is now figuring butter on the 83 per cent. fat basis, which I think is right. I noticed this in the list of cows showng over 700 lbs. butter under authenticated test.—Geo. H. Sweet, East Aurora, N. Y., in Jersey Bulletin, June 23.

The Wichita Weekly Eagle offers $300 for the best bushel of wheat grown in Kansas during the season. The contest for the prize will be open to the state and will take the character of a great wheat show to be held in Wichita during the week of the fall festivities, Sept. 20 to 25.

State Commissioner of Agriculture R. A. Pearson, has appointed Dr. Veranus A. Moore, Director of Cornell Veterinary College, a special representative to make a study of the problem of tuberculosis throughout the various countries of Europe, particularly England, Germany and Denmark. It is understood that Dr. Moore will leave for Europe soon.

Bulletin No. 134, Vol. 14, June, 1909, Purdue University, Ind., is a treatise upon the subject of "The Estimation of Fat in Unsweetened Evaporated Milk by Modified Methods. Accuracy in testing evaporated milk by the common Babcock method is not uniformly attainable. This treatise points out methods by which satisfactory results may be obtained.

George D. Clark, who has a large farm north of Vassar, Mich., received a car-load of twenty-five head of thoroughbred Holstein cattle from New York state last week Thursday, which were placed on his farm.

Just what amount is represented in this car of stock is not known, but the sum is a large one. The importing of Holstein cattle into Tuscola county has been going on much of late and several farmers have from time to time shipped in cattle from other states, but this shipment is the largest yet received.—Michigan Dairy Farmer.

The office of the World is favored by A. P. Sandles, Secretary of the Board of Livestock Commissioners for the State of Ohio, with the schedule for the meetings of the Ohio Allied State Associations, which are to be held at Columbus from Jan. 3 to 15, inclusive. There are to be three sessions daily, morning, afternoon and evening, with a "Grand Combination Banquet at Memorial Hall" upon the evening of Jan. 13. Many speakers of national reputation will be present. We note that meetings of Holstein-Friesian Associations are set down for afternoon and evening of Jan. 7, and morning and afternoon of Jan. 8. Each association will arrange its own program, conducted by its own officers and retain its own individuality. At the same time it is proposed to have at least three general meetings, at which time all who are in attendance will assemble at one place and listen to the same speakers. The meeting promises to be a gigantic affair.

...NOTICE...
TO
HOLSTEIN-FRIESIAN BREEDERS

That the KING OF THE BUTTER KINGS is justly deserving of his title, as his dam is now the only daughter OF A SIRE AND A DAM, each of which are the producers of two 30 lb. daughters. This FACT demonstrates more fully than pen can tell what intense breeding produces.

Read Mr. Cleveland's letter in this issue for confirmation of these facts.

The KING OF THE BUTTER KINGS will stand for the balance of the season at the farm of J. H. Johnson, Farmington, in the State of Michigan, the birthplace of the families of the Pontiacs and the Hengerveld DeKols.

TERMS:

$100.00 for service to ..... one cow
75.00 for service to ..... two cows
60.00 for service to ..... three cows
50.00 for service to ..... four cows or more

For a copy of a pedigree, verified by FACTS that will enlighten all Holstein breeders as to the greatest producing families of the breed, address.

C. S. AVERILL THE YATES HOTEL Syracuse, N. Y.

### E. W. FUGGLE SOLD OUT.

Manlius, N. Y., R. D. 2.
July 2, 1909.

Editor H.-F. World:

I enclose check herewith, as per bill for advertising to date. I have sold my herd with the exception of my herd bull and one cow so have nothing for sale. Will you please stop my adv. for a time; expect to have more in the near future and as soon as I have anything for sale will place and adv. with you.

I had answers from my adv. from Massachusetts to Nebraska, and as far south as Delaware.

E. W. FUGGLE.

### HILLHURST FARM.

Oneida, N. Y., June 21, 1909.

Editor H.-F. World:

The call for high class registered stock with us has never been so great as at the present time and we are reducing our herd rapidly, but still we are in a position to furnish almost anything in the line of hgh class registered Holsteins.

Having sold the greater portion of our young stock we are offering three very choice January heifers, as per enclosed, which we ask that you kindly insert in next issue.

We pride ourselves quite a little on being able to show a herd possessing extra size together with constitution and beauty of form.

Visitors are always welcome at our place and it is a pleasure to show stock whether they purchase or not.

We thank you very kindly for the courtesies shown us in the past and beg to remain.

Fraternally yours,
RIVENBURGH BROS.

### UNITED BREEDERS' ASSOCIATION.

Wyalusing, Pa., June 30, 1909.

Editor H.-F. World:

Many of the readers of your valuable paper will remember the magnificent bull, Korndyke Abbekerk, sold in the June sale to members of the United Breeders' Association. We are very much pleased with him and so are the other breeders in this vicinity who have seen him; he resembles King of the Pontiacs very closely and is bred nearly the same.

Several cows have been sent here and bred to him and others are booked to be bred to him.

Sales have been good during the past few months.

Mr. John Puls, Hartford, Wis., was here recently and selected 15 young cows and heifers for an addition to his herd of black and whites.

We are now offering several fine show bulls of different ages; also a very richly bred bull calf by a son of a 30 pound cow out of one of the best young cows in this county, she by Beryl Wayne's son; also a bull calf by Woodcrest Nig DeKol out of a grand A. R. O. cow; also another bull calf by Gem Hengerveld DeKol Butter Boy out of Manor Korndyke Wayne Tirania, a very richly bred 3 year old heifer, whose dam, granddam and sire's dam have A. R. O. records which average over 21 lbs. each.

Anyone interested should send for our bull list. G. M. LYON, Sec.

### CORRECTION.

Liverpool, N. Y., June 18, 1909.

Editor H.-F. World:

In the June 8th issue of the World (page 203) in giving a report of the Breeders' Consignment Sale, you mention A. & G. Burke Segis Inka sold to E. L. Hall for $395, and bought back at $400. This is a mistake. We offered to buy this animal of Mr. Hall at $400, but he refused to let her go and after the sale Mr. Hall came to us and said he wanted more of her quality and breeding, and the result was that he purchased of us another very highly bred and promising individual in Queen Burke Hengerveld DeKol, a magnificent heifer nearly two years old sired by Hengerveld DeKol, and her dam a daughter of DeKol Burke, who with second calf produced 23½ lbs. butter in 7 days. The heifer was safely in calf by King of the Pontiacs and Mr. Hall, like many others, believes in this combination of blood. He is to be congratulated upon his purchases both at the sale and private treaty. He is a young man of ability, having the best of judgment and, while he is comparatively a new man in the Holstein business, we expect he will make a great success. He already has a dozen or more animals that would do credit to any herd and thus far in other business enterprises which he has conducted, he has been very successful. His home is Oneonta, N. Y., where he is held in the highest esteem.

STEVENS BROS. CO.

### E M. HASTINGS.

Lacona, N. Y., July 3, 1909.

Editor H.-F. World:

My advertisement in your valuable paper has brought me a number of inquiries, and has resulted in some business. Mr. Elmer Bogardus, Fulton, N. Y., purchased of D. J. Hollis, Lacona, N. Y., a very desirable yearling bull, sired by a son of DeKol 2d's Butter

## The 1908-9 List of 20-lb. Cows.

Below we present the list of Holstein-Friesian cows that have produced over 20 lbs. of butterfat in seven consecutive days, as compiled by us. We have labored to make this list complete and correct, and trust that it is so, at least, approximately. We have given the name of the cow, the owner, her age, pounds of milk and pounds of butterfat.

There were 194 cows in the list at the beginning of the official year. Twelve of these increased their records and 98 other cows were added, making the official year just closed, contribute over 37 per cent. of the entire list. This seems quite wonderful, and indicates the rapid strides being made in the A. R. work.

We do not consider it necessary to add anything further by way of comment. The list will speak for itself and eloquently. Here it is:

1. Grace Fayne 2d's Homestead, H. A. Moyer. 6-0-23—524.5—28.440
2. Colantha 4th's Johanna, W. J. Gillett, Rosindale, Wis. 8-1-19—651.7—28.176
3. Betta Lyons Neth., H. A. Moyer, Syracuse, N. Y. 5-11-3—623.0—27.764
4. Aaggie Cornucopia Pauline, H. D. Roe, Augusta, N. J. 4-11-4—659.2—27.459
5. Blanche Lyons DeKol, H. A. Moyer. 6-2-19—608.8—26.650
6. Johanna Colantha 2d, W. J. Gillett. 5-11-15—523.9—26.309
7. Dichter Calamity, John Arfmann. 5-6-3—631.2—25.920
8. Frensta Hengerveld DeKol Wing R. Smith. 6-4-12—548.3—25.757
9. Segis Aaggie DeKol Beets, H. A. Moyer, Syracuse, N. Y. 8-9-2—607.2—25.645

Holstein Cattle

# At Greenwood Stock Farm

S. C. White Leghorn Fowls

You can expect to get served with the most **popular quality at prices** that are right. We have made our share of the 30 lb. records, two of the **World records** and have this **quality of stock** to offer, closely backed by four of the **30 lb.** cows that average **33.23 lbs.** butter each in 7 days and **128.14 lbs.** in 30 days. One of the bulls in service is backed by 6 of the 7 nearest, dams that average 26½ lbs. butter each in 7 days. We offer in young stock **Spoffard, DeKol, Burke, Hengerveld, Ormsby, Pietje 22d, Hemestead Girl DeKol, Sarcastic Lad, Prince Ybma Spoffard and Betta Lyons Netherland** blood. Our records show sales to customers, during the past few years, amounting to over $80,000.00. Write for just what you want.

# Moyerdale Herd of High Class Holstein-Friesian Cattle.

## KING SEGIS NO. 36168 AT THE HEAD OF THE HERD

**THE WORLD'S GREATEST SIRE at 5 years of of age.**

**THE ONLY SIRE OF THE BREED that has four 20 lb. junior 2-year-old daughters and one 24 lb. senior 2-year-old daughter, LEILA INKA DE KOL No. 85174, a daughter of King Segis at 2 years, 9 months, 1 day of age, has just made a 7 day record of 24.61 lbs. of butter, averaging 4.56 per cent fat, which is a world's record for a senior 2-year-old with first calf.**

**This makes King Segis the sire of the youngest 24 lb. cow and the sire of the youngest 21 lb. cow of the breed. No matter how well other sires are bred, they are unable to produce daughters equal to King Segis.**

**I have only five sons of King Segis for sale, which will all be one year old from one to three months later.**

**FOR SALE**

Korndyke Zella 111157, born December, 1907. Sired by Korndyke Abbekerk 34503, who combines the blood of Pontiac Korndyke & Hengerveld DeKol.

Dam, Zella DeKol Inka 79932, a cow that gives 4 per cent. milk and has a 2 year old daughter that has just made 15½ lbs. of butter.

I also wish to sell Prince Korndyke Inka, born Feb. 1, 1909, own brother to above.

These are both very fine individuals, extra large and nicely marked.

**S. W. Hagan, Lacona, N. Y.**

# Do Your Cows Milk Hard?

**Save the Milk, the Extra Work in Milking, and Prevent Injury to the Cow.**

**Many good cows are spoiled, because they milk hard and are, therefore, only half milked by careless milkers.**

**Dr. David Roberts' Hard Milking Outfit, shown here, used as directed, will overcome the trouble, save the hard work, save all the milk and save the cow's usefulness.**

Milking tubes are only makeshifts, do not remedy the trouble, and besides, are injurious.

These Teat Plugs are simply inserted in the teats and permitted to remain between milkings for a few days, until the sphincter muscles of the teats are normally and permanently relaxed.

The outfit shown here is complete, including a long teat plug for overcoming contraction near the udder, and a short teat plug, for relaxing the muscles at the tip of the teat, a bottle of Germ Killer for making an antiseptic wash, and a liberal box of Badger Balm for healing sore teats and lubricating the plugs.

The teat plugs, bottle and box are made of aluminum and enclosed in a neat case. Full directions on the inside of the lid.

Send us 50 cents and we will forward the outfit by mail postpaid at once.

**DR. DAVID ROBERTS VETERINARY CO,**
**967 Grand Avenue, - - Waukesha, Wis.**

## NEW ADVERTISEMENTS.

Hillhurst Farm offers cows and heifer calves at "less than half their value". Rivenburgh Bros., Oneida, N. Y., proprietors.

Fred Dixon, Auburn, N. Y., offers a DeKol Burke calf out of a 19.23 lb. dam for $75. Mr. Dixon writes: "The one offered in the June 22d issue of the World is sold, thanks to your paper".

In sending change of ad., W. W. Cornwall says: "My previous ad in World did the trick. The first inquirer got him. Will report later". His present offering is a calf out of Sir Oak Duchess Ormsby, and Lady Oak 2d, who has three daughters that average 24.56 lbs. Sixty dollars secures him.

(Continued from Page 235.)

Boy 3d and Clothilde Eva, the 24-lb. cow that we sold to D. W. Field some years ago (when I was with The Stevens Brothers-Hastings Company). Mr. Bogardus wrote me that he wanted a light-colored bull to breed his grade Holsteins, believing he would be able to sell these cows at a better price next spring, if in calf by a good, pure-bred Holstein sire. Mr. Hollis happened to have this one yearling bull left (the animal having been rented for a few months to a neighbor), and he proved to be just the kind that Mr. Bogardus was looking for. In this vicinity are one or two other desirable yearling bulls that I can offer at bargain prices.

Last evening I received a check for a yearling bull that is to go to W. R. Selleck, Huntington, L. I. This animal was likewise sired by a son of DeKol 2d's Butter Boy 3d'; and he also came originally from Mr. Hollis' herd.

A couple of days ago, Gordon H. Manhard, Manhard, Ont., shipped from here a carload of exceptionally fine cows that were purchased from Hillside Herd, of which George Gue is in charge. From former dealings with Manhard, I was able to judge closely as to the type of animals he was looking for; and he expresses himself as more than pleased with his purchases. His selections from the herd of Hagan & Sons included the cow, Shadeland Milly DeKol (19.26 lbs. A. R. O.) and her two and three-year old daughters, both by the same sire, DeKol Perfection Pietertje, a son of DeKol 2d's Butter Boy 3d and Grace Pietertje Pauline DeKol, a daughter of Paul Beets DeKol and old Aaggie Grace 2d's Pietertje. These three made an unusually desirable purchase; but are only representative of the values that can be found in this vicinity.

Judging by a series of pedigree charts that I have been having printed for T. A. Mitchell, Weedsport, N. Y., it would appear that he has some fine young bulls to offer for sale; also The Stevens Brothers Company, Liverpool, for whom I have lately tabulated as many as two dozen pedigree charts of first-class young bulls.

Very truly,
E. M. HASTINGS.

## EDGELAKE FARM

offers for sale 3 young bulls sired by a grandson of Sarcastic Lad, Aaggie Cornucopia Pauline and Paul Beets DeKol. One 17 months old, largely white whose dam has A. R. O. record of 22.10 lbs. butter, 4.17 per cent fat. One 16 months old half black whose dam has A. R. O. record of 24.25 lbs. butter, 4.00 per cent fat. The other 12 months old two-thirds black whose dam is a daughter of Paul Beets DeKol with A. R. O. record of 19.46 lbs. butter, 3.85 per cent fat at four years of age.

**B.W POTTER & SON, Rutland, Mass.**

## NOTES ON HOLSTEIN SALESMANSHIP.

One of the first essentials of successful salesmanship is sincerity, which means that the salesman must believe the wares he offers for sale, are worth buying at the price asked. Sharpness and skill in driving a bargain, may force worthless goods into the hands of a reluctant buyer; but this is not good salesmanship any more than it is good business—if reputation and future successes are to be considered.

"How much do you want for that cow?" inquires a prospective purchaser. The breeder, who happens to be of the right sort, answers, "I'm afraid that cow isn't just what you want. We can sell her for less than she looks to be worth. The fact is, she aborted a few months ago, and you probably wouldn't want to consider her at all." The visitor goes away without buying; and the would-be seller regrets, not his own plainness of speech, but the conditions that made the cow undesirable.

But evidently it comes to be known that the breeder who tells the truth concerning his cattle, and does not withhold the points that a purchaser ought to know, is a man to be relied upon, and his statements always carry with them the weight of positive honesty. He sells because his representations are accepted. He thinks himself only a plain, practical Holstein breeder, but in reality he is developing into the finest type of Holstein salesman.

E. M. HASTINGS.

Lacona, N. Y., June 28, '09.

## NUGGETS.

A typical egotist—a cackling hen.

A fool's greatest misfortune is being born.

Uncle Joe is the canon that fired the shot heard round the world.

Many so-called farmers seem to be trying to mine their farms, rather than to cultivate them.

I guess we can get along without a parcels-post—we can send our parcels by express, you know.

Certainly, keep a high tariff on imported lumber and so protect and preserve our American forests.

We wonder if the people are beginning to see the immensity of the joke perpetrated by the politicians when they promised "tariff revision".

## FOR SALE—HOLSTEIN BULL CALVES

Sired by LORD NETHERLAND DE KOL, BARON NETHERLAND DE KOL and LORD NETHERLAND COUNT DE KOL reasonable prices. Correspondence solicited. Photograph of calf furnished if desired.

**SAMUEL J. TILDEN, Proprietor**

**BURNE-MEADE FARM** **NEW LEBANON, N. Y.**

---

## Earl Korndyke De Kol, No. 24954

if sire of 9 cows and heifers in the Cornell University herd with average yearly records so11257 lbs. milk and 396 lbs. butter fat,with ordinary feed and two milkings per day, and were bred. We can't all be milllonaires and this is a good kind for men of moderate means to own. We have a nice lot of young heifers sired by him. He is a son of that Grand old cow Belle Korndyke.

**ISAAC DALRYMPLE, - Otselic, N. Y., or Preston, N. Y.**

---

**NOTICE TO HOLSTEIN BREEDERS**

---

## WHITE SPRING FARM

**Offers a Grandson of Betta Lyons Netherland, A. R. O. 34.70**

Out of a 13.5 lb. 3-year-old dam. This calf was born Dec. 1, 1908, a little more black than white and is all right in every way. Price $125. If not satisfied return and get your money back.

**D. E. CARLEY, Lisle, N. Y.**

---

## A Great Bull—A Rare Bargain

I have decided to offer my great yearling bull, Sir Clothilde Hengerveld,—which in the number and size of records of his ancestors, probably has no equal, of any age or breed.

He is a grandson of Hengerveld DeKol, and also of King Segis. He has 30 A. R. O. dams,—27 above 20 lbs., and they average over 25 lbs., and back of these 30 A. R. O. dams,—several heifers whose records average over 23 lbs., making a total of 60 dams, whose records average over 24 lbs. Can any other bull make such a showing?

His dam,—a junior 2-year-daughter of King Segis, with 17.85 lbs., and full sister in breeding to Netherland Segis, 3 year junior, 25.38 lbs.

Sire's dam,—28.85 lbs., as junior 4-year-old by Johanna Rue 3d's Lad. A beauty, —one-half white,—13 months old. A great bargain.

E. A. POWELL. 904 W. Genesee St., SYRACUSE, N. Y.

---

## The Buttercup Dairy

Offers a bull calf born January 10, 1909. Sire, Sir Oak Duchess Ormsby 35255, whose dam, Lady Oak 2nd, 21 lbs. butter, has three daughters that average 24.56 lbs. butter; one, Oak DeKol. 30 lbs. butter, average test 5.57 per cent., dam of Oak DeKol 2nd 29.55 lbs. butter.

Calf from a young Korndyke cow that has produced 70 lbs. of milk in one day, 2000 lbs. in 30 days. Sixty dollars secures him.

W. W. Cornwall, Prop.

S. Wales, Erie Co. N. Y.

E·M·HASTINGS

HOLSTEIN ADVERTISING

Editor Brown:

In my sale list are now left several splendid heifers nearly old enough to breed, a dozen young cows milking 40 to 72 lbs. a day, and a number of others due next fall by one of the best bulls of the breed. These are all good, and worth more than the prices asked. A few young bulls that will interest any p ospective buyer.

Yours,

**E. M. Hastings.**

---

# FAIRVIEW FARM

HOME OF

## PONTIAC KORNDYKE, No. 5982

sire of five daughters, four of them still in this herd, that have seven day records that average 28¾ pounds butter each, and every one of them average better than 4 per cent fat. He is the sire of four daughters, three of them still in this herd, and only one mature cow, that have seven day butter records that average 29¼ pounds each and 4.4 per cent fat. No other bull of the breed can equal this. We have about 60 of his daughters in our herd.

Why not select a son of this great sire to head your herd and increase the per cent of fat in your milk. Pontiac Korndyke, is transmitting that high per cent of fat with a degree of certainty rarely equaled in a bull of this breed. We have a lot of his sons for sale from two weeks to ten months old. Some that have 75 per cent same blood as their sire. If you are in the market for a bull let us send you their breeding. Come and look the herd over.

E. H. DOLLAR, - - - - - Heuvelton, St. Lawrence Co., N. Y.

---

## The Kind that Sell is the Kind to Breed,

and if you have been bothered in the past to find a sale for your bull calves, you can remedy this trouble by placing a son of Karel Korndyke, (the greatest son of Belle Korndyke 25.77 lbs. butter 4.02 per cent fat) at the head of your herd.

When you buy your next bull, one cow or a carload, I invite your inspection of Maple Lawn Herd before purchasing elsewhere.

### Lawrence L. Grow

Fort Jackson, St. Lawrence Co., New York
